

# Lantania lands new projects worth 47 million euros in Poland

- It will oversee the renovation of the tramway and road network in the centre of Lodz as well as the construction of a new building for the city's Land Registry Office

**Madrid, 21 October 2022.** Lantania will undertake projects worth 47 million euros (PLN 225.5 million) in Poland. The infrastructure, water and energy group has been awarded, through its subsidiary Balzola Polska, five new contracts in Lodz for the renovation of a tram line, the modernisation of one of the main roads in the historic city centre and the construction of the Land and Mortgage Registry building. Located in the centre of the country, the city of Lodz is the fourth most populated city in Poland.

The Lodz municipal investment agency has awarded Lantania a contract for the renovation of the tram line between Legionow and Cmentrna Streets in the city centre. The project is divided into three parts, which the company has won in full and for which the total amount is 24.3 million euros. The company will carry out the renovation of a 4.2 km long tram line, the stone paving of unpaved pavements, build the catenary and all underground networks, plus traffic lights and landscaping works. Work will begin before the end of the year and is scheduled to last 10 months.

Lantania will also be responsible for the modernisation of one of the main roads in the historic centre of Lodz, Mielczarskiego Street, for 4 million euros. This is part of a set of works that will be carried out to rejuvenate the heart of the city. The company will renovate a 500 metre long street creating a modern *woonerf*, a socialising space where children can play safely, pedestrians and cyclists can move freely and where cars cannot drive faster than people walk.

Also in Lodz, the company has been awarded a contract by the Court of Justice for the construction of a new building for the Land Registry Department, a project amounting to 18.7 million euros. The new infrastructure will have a usable area of 9,000 m<sup>2</sup> and a total surface area of 40,000 m<sup>3</sup> distributed over seven floors. The works will take 36 months to complete and are scheduled to start immediately.

## Lantania in Poland

Lantania is present in Poland through its subsidiary Balzola Polska, a company it acquired last March. Specialised in the execution of railway and road civil works projects, with extensive experience in the construction of tram infrastructure and also in all types of urban development works, it has given the Group a foothold in the high-potential market of Poland and has also strengthened the company's position for development in Eastern Europe.

Balzola Polska, founded in 2008 and whose headquarters is in Warsaw, plans to close this financial year with a turnover of 38.1 million euros, an increase of 18% compared to the 32.3 million euros achieved in 2021.

Balzola's recent works include the construction of new tram lines in the cities of Warsaw, Torun and Gdansk, the upgrading of the Mokotow tram depot in Warsaw and the renovation of Lodygowa Street, Trakt Lubelski and Jana Pawla II Avenue, also in the capital.

### **About Lantania**

The Lantania Group builds large transport, water and energy infrastructures. It develops sustainable solutions that improve quality of life and promote a cleaner and healthier world. Lantania has a portfolio of work in progress of over 650 million euros and assets of over 200 million euros. The maintenance of the runways of the Adolfo Suárez-Madrid Barajas Airport, the electrification of the first section of the high-speed train to Extremadura, the urbanisation of the Central Breakwater of the Port of Bilbao expansion or the construction of a solar plant in the City of Justice in Valencia are some of Lantania's outstanding projects. The company is already present in Colombia, the United States, Saudi Arabia, Algeria, Morocco, Poland, Slovakia and Bulgaria.
